	5	9	6	7	5

b : bioinformatics
 1 : 101
 3 : 330
 4 : 482
 5 : 503

2.
$$\frac{5 + 8 + 2}{5 + 10 + 10 + 5 + 1} = \frac{15}{31} \approx 0.48 = 48\%$$

Hence, the percentage of frequent itemsets is 48%.

3. The pruning ratio of the Apriori algorithm on this data set is $\frac{11}{31} \approx 0.35 = 35\%$.

4. The false alarm rate is $\frac{5}{31} \approx 0.16$.

5. Rank all items: 330, 503, 482, 101, bioinformatics
 9 7 6 5 5
